EDUCATION

- **SJB Institute of Technology** Expected 2026
Under the affiliation of Visvesvaraya Technological University (VTU)
BE/BTech in Computer Science & Engineering CGPA - 8.71 /10
- **Sadhana PU College** 2022
Karnataka Secondary Education Examination Board, Karnataka Percentage: 84
- **Sri Jnanakshi Vidyaniketan** 2020
CBSE Board , Karnataka Percentage: 80

WORK EXPERIENCE

- Tech Mahindra** June 2025 - Present
Trainee-support
- Learned the basics of **API testing and backend workflows** using Postman through guided exercises and mentorship.
 - Assisted in running simple **API requests** and analyzing responses in test environments.
 - Observed and documented **ticketing flows** using **Jira**, gaining insight into real-world issue tracking and escalation processes.
- Adversity solutions** March 2025
Blockchain Developer intern
- Developing and testing secure **smart contracts** using **Solidity** and **Hardhat** for deployment on Ethereum (Sepolia testnet).
 - Building and integrating decentralized applications (dApps) using **Ethers.js** and **Web3** tools.
 - Participating in **code reviews**, **debugging**, and researching blockchain protocols like Ethereum and Hyperledger.

PROJECTS

- RegenX: Dynamic Geofencing-Based Waste Management Platform** | [RegenX](#) Ongoing
- Built a real-time waste management app using **Kotlin** and **Firebase Cloud Messaging**.
 - Integrated **dynamic geofencing** via Google Maps API for location-based alerts.
 - Developed AI-assisted complaint validation with **TensorFlow Lite** and an admin dashboard for officials.
- GoTogether: Smart Ride-Sharing & Rewards Platform** | [Gotogether](#) March 2025
- Developed a scalable backend architecture for a ride-sharing platform using **Node.js**, **Express**, and **MongoDB**
 - Engineered real-time route optimization by integrating **Google Maps API**
 - Designed and deployed a secure payment system with **Razorpay API** integration
- CogniChat: A Cognitive Assessment Therapist** | [CogniChat](#) Dec 2024
- Developed a mental health chatbot using **BERT**, **GPT**, **Flask**, and **MongoDB**.
 - Integrated dynamic persona switching based on real-time emotion detection.
 - Used NLP and GPT for sentiment-driven conversation flow, improving relevance and empathy in user responses.

TECHNICAL SKILLS

- **Programming:** Python, Java, C, Solidity, Kotlin, HTML, CSS
- **Database:** SQL, MongoDB, Firebase
- **Development:** Git, GitHub, VS Code, Android Studio, Ethereum (Testnet: Sepolia)
- **Tools & frameworks:** Hardhat, Ethers.js, React.js, Node.js, Express.js, Flask, GPT, Metamask, Ganache
- **AI/NLP:** TensorFlow Lite, GPT, BERT
- **Soft Skills:** Adaptability, Leadership & Team work, Time Management, Critical Thinking

EXTRACURRICULAR

- Participated in 24 hour hackathon conducted in BGSCET
- Achieved top 20 position in SKIT 'Build for Bengaluru' 12 hour Hackathon
- Participated in SIET Tumkur 24 hour 'National Level Hackathon'
- Conducted a week-long social media awareness program for high school students.
